

THORENS
 TD 121 and
 TD 124 Transcription Turntable
 Mounting template (full size)
 CB. 935

Recommend

1. Place this template in the proper position on the turntable with tape strips. If you cut the template along the outline of unit plate, it may ease the location on the turntable.
2. Mark the center of the turntable with a pencil.
3. Mark along the outer edge of the turntable.
4. Remove the turntable and cut out the panel.
5. See cut view for the assembling of rubber dampers and leveling devices.

Notice. It is advisable to check the distances indicated on the template according to the actual shrinkage of the template. The use of washers and nuts M 5 VSM 12707 is optional. These should be ordered from...

Procedure for installation

1. Place the top of the mounting panel in the turntable with tape strips. If you cut the template along the outline of unit plate, it may ease the location on the turntable.
2. Mark the center of the turntable with a pencil.
3. Mark along the outer edge of the turntable.
4. Remove the turntable and cut out the panel.
5. See cut view for the assembling of rubber dampers and leveling devices. Allow 3" space below top of the turntable.
